Due to Covid-19, some procedures may be unavailable

Microneedling with Collagen PIN - Medical grade Microneedling creates micro-injuries to the skin which stimulates the formation of new collagen. This induces repair, resurfacing and smoothing. We love this procedure for skin texture/pigment concerns, acne scars and overall maintenance of glowing skin.

Laser Treatments

IPL (Intense Pulsed Light) can be used to treat specific concerns on the skin including redness, broken blood vessels, photo damage, also known as brown spots, hyper pigmentation and overall pigment irregularity, as well as age spots and freckles. IPL can also be used for removing unwanted hair in the bikini line, face, underarms, legs and chest by destroying hair follicles that produce hair. It is more effective for people with darker hair. For most IPL treatments, it typically takes three treatments before desired results are achieved. The sessions are spaced a month apart to give the skin enough time to heal.
